

DRG indoor window connection film

DRG indoor window connection film consists of a plasterable non-woven composite on one side or alternately with butyl or Self-adhesive laminated. The indoor connecting film is used for quick and safe internal, airtight and vapour barrier sealing of window connecting joints and can also be used as a plasterable internal sealant. The holding surfaces must be dry, free of oil, grease, dust and other anti-adhesive components. On very porous surfaces we recommend a primer coat of butyl & bitumen primer when bonding with butyl.

Technical data - Product features

Material		Polypropylene-nonwoven composite on one side, red
Finished weight	g / m ²	210 ± 10 %
Fire class E		complied
Water pressure resistance	cmWS	> 200
Adhesiveness		12 N/25 mm of self-adhesive
Max. tensile force (longitudinal)	N / 5 cm	560 ± 20 %
Max. tensile force (transverse)	N / 5 cm	105 ± 20 %
sd value	m	60
Temperature stability		- 40 °C to +80 °C
Application temperature		-5 °C to +40 °C

STORAGE: DRY AT ROOM TEMPERATURE IN THE ORIGINAL PACKAGING;
SHELF LIFE 1 YEAR AFTER RECEIPT BY THE CUSTOMER.
